

The facilities of Patras Greek Paintball Parks are located in an area of 4.000 s.m. in Ovrva. The structure of the place and its organization, reveal the top paintball field. The convenient parking place, the press room, the dressing room, the coffee house and the place of equipment maintenance contribute to the excellent visitor service

The field is totally enclosed by a special protective net 6 m. high that assures the safety of the spectators. The burdens for the players are both natural and artificial (olive trees, other constructions etc.). Every summer, we hold championships which all interested can join, as long as they form a team of five people. The prizes are more than appealing.

Greek Paintball Parks of Patras is ready to let you know an exciting experience and lead to a world where weapons do not harm but colour- colour our life!
